Basel, April 2022

### Your application for the electricity saving bonus 2022

All residents of the canton of Basel-City receive every year a bonus for saving electricity. The funds for this bonus come from the incentive tax. The canton levies this tax on the price of electricity in order to motivate the population to use electricity efficiently and sparingly. The annual payment is laid down in the energy act of the canton of Basel-City.

The persons registered with the Basel-City residents' registration office on 15 December 2021 are the decisive factor in determining entitlement to the 2022 bonus. Only those persons who have to be newly registered for the database of the electricity saving fund will receive this application. Full age, unmarried co-inhabitants in your household receive the bonus separately and are therefore not listed here.

You will receive the 2022 bonus of CHF 62.00 each for the following person(s):

*(Here is a list of all persons which belong to your household)*

This results in the following bonus: Fr. *(your bonus total amount)*

In order for the bonus to be paid out, you must confirm your participation in the electricity saving bonus and provide us with your account details.

Please complete the enclosed bonus application form (capital letters only, clearly legible, in blue or black letters only) and return it to us by 14.05.2022 at the latest. If we receive your application at a later date, payment will be made at the end of 2022. Your application must be submitted by 31.12.2022 at the latest, otherwise your entitlement to the 2020 bonus will be forfeited.

With kind regards

Your team of the electricity saving bonus Basel-City
